Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-49, drawn to compounds, compositions, uses and 1st recited process of making.

Group II, claim(s) 50, drawn to a 2nd process for making some of the compounds of I.

Group III, claim(s) 51, drawn to a 3rd process for making some of the compounds of I.

Group IV, claim(s) 52, drawn to a process for making spirofused pyrrolidiones of formula XIII.

Group V, claim(s) 53, drawn to a 4th process for making some of the compounds of I.

Group VI, claim(s) 54, drawn to a 5th process for making some of the compounds of I.

Group VII, claim(s) 55, drawn to a 6th process for making some of the compounds of I.

Group VIII, claim(s) 56, drawn to a 7th process for making some of the compounds of I.

Group IX, claim(s) 57, drawn to a 8th process for making some of the compounds of I.

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Where more than one process of making exists, the 1st recited process is considered to form part of the main invention. See 37 CFR 1.475(d). Additionally, the process of claim 52 makes compounds that are NOT within the scope of group I and thus cannot be said to share a special technical feature with said compounds.

A telephone call was made to the office of Mr. Desmukh on 9/18/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP

Art Unit: 1624

§ 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
